160,33 SPS CARBON RR SILENCER

Designed in the R&D center of Bologna, SPS CARBON RR is provided with high end carbon fiber details that coat the octagonal titanium body. Bench and deep road tested, SPS CARBON RR is robust, it guarantees security and maximum reliability while asserting itself as a best in class when it comes to performance. The carbon fiber end cap and protective heat shield provide an impeccable look to the KTM 1290 SUPER ADVENTURE rear part, perfectly blending into the Austrian beast's design. The SPS CARBON RR slip-on slides onto the original header pipes without having to remove the catalytic converter, it meets the EURO5 regulations and allows for major weight savings (-2,56 kgs compared to stock muffler). The octagonal shaped body has strong lines to mirror the adventuresome spirit of whoever is willing to conquer uncharted territories. The titanium body is available in natural titanium and black ceramic finish.
