HP CORSE and STEELFORM: Together for the best of Made in Italy

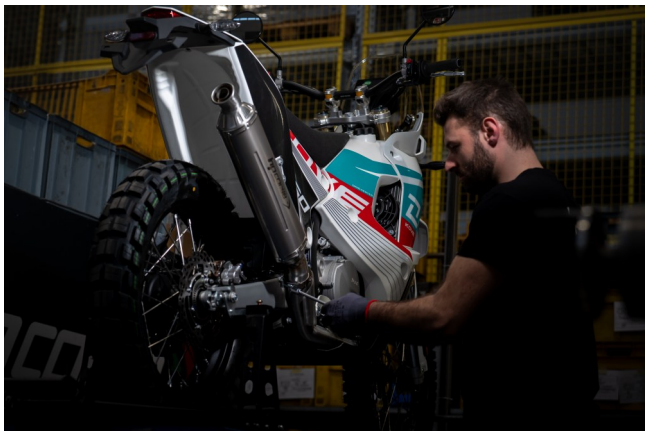

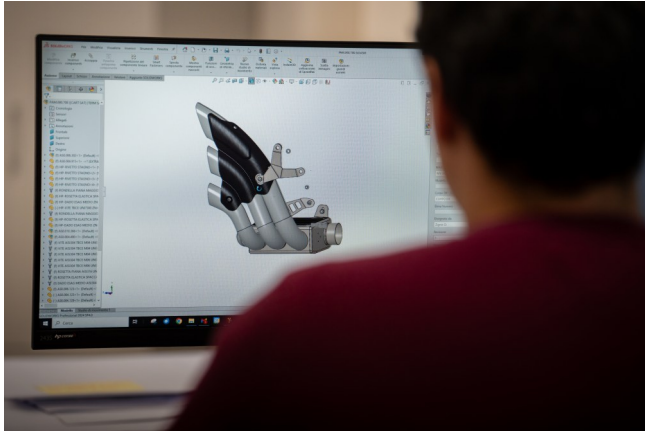

The merger between HP CORSE and STEELFORM marks the beginning of a new industrial era where design, innovation, and Italian craftsmanship unite to create exhaust systems of absolute excellence.

Drawing on **HP CORSE's expertise in designing and engineering high-performance silencers** and **STEELFORM's mastery in metalworking and precision manufacturing**, this partnership forms a perfect synergy, a group capable of conceiving, developing, and producing entirely in Italy products that represent the very pinnacle of Italian motorcycle craftsmanship.

Artisanal passion and advanced technology come together to deliver uncompromising quality, reliability, and style to those who experience motorcycling as an expression of art and freedom.

HP CORSE and STEELFORM: together to create the future in the name of Italian excellence.

Passion, Technology, and Emotion in Design

At HP CORSE, design is born from a clear vision: **to transform technology into emotion.**

Every curve, every line, every surface tells a story that comes to life in the heart of Italy's Motor Valley, where art meets mechanics and passion takes shape.

HP CORSE designs and manufactures **high-performance exhaust systems** that unite technology, craftsmanship, and functional beauty.

Each silencer is the result of over **thirty years of experience**, racing research, and aerodynamic and acoustic development, created to deliver exceptional performance and a distinctive, unmistakable design.

Behind every product stands a **young and passionate team**, people who pour their heart and soul into their work every day, **transforming metal into pure emotion.**

Our people are the true strength of HP CORSE: the human passion that gives life to mechanical perfection.

Details such as **handcrafted TIG welds, hydroformed end caps, laser-engraved logos**, and **hand-finished satin surfaces** are the hallmarks of a philosophy that never separates technology from aesthetics, but blends them into a single expression: **the beauty of handcrafted performance.**

hpcorse ➤

THE HP CORSE ADVENTURE RANGE

The HP CORSE Adventure range is designed for those who experience motorcycling as an extension of their freedom.

From the most essential and lightweight models to versions with carbon fiber finishes, every HP Corse silencer and header pipe is created to deliver outstanding performance, absolute reliability, and unmistakable style.

Design is the functional soul of every creation: every curve, every detail, and every surface express strength, character, and the spirit of adventure.

SP TITANIUM Series

Simplicity elevated to pure beauty. Clean lines, fine materials, and timeless elegance.

SPS CARBON / 4-TRACK Series

The essence of adventure. "Off-road" soul and rally spirit for those who love freedom beyond the asphalt.

SP-3 CARBON Series

Born for speed. Sharp, dynamic design for the most sporty and aggressive bikes.

SPS CARBON RR / 4-TRACK RR Series

Extreme adventure. Performance, power, and durability designed for Maxi Enduros and true off-road machines.

FULL HEADERS

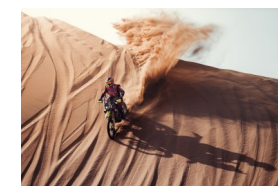

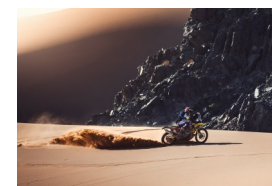

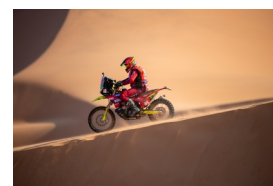

Precision and total power. Designed in 3D CAD, they ensure optimal flow, absolute strength, and top-tier finishes.

SP-1 TITANIUM STREE LEGAL

Simplicity becomes art.

The SP-1 is born from the pursuit of pure essence: removing everything unnecessary to express function in its most authentic form. Because true essence lies in simplicity. Designed by HP CORSE in the heart of the Motor Valley and inspired by the great African rallies, the SP-1 looks to the future while passionately reinterpreting the past.

A super-light oval-shaped exhaust with a clean, round outlet, no welds along the bend, perfectly integrated into the rear of the latest mid-displacement off-road motorcycles. Strong, tireless, and durable, the SP-1 features a titanium silencer body and a Slip-On connection to the link pipe.

It is available in both **homologated** and **racing** versions with a removable dB killer.

Hand TIG-welded support brackets, solid-machined mounting bushings, and the laser-engraved HP CORSE logo are clear signs of the artisanal excellence behind every detail.

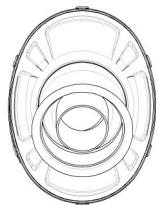

Extensively tested on the dyno and in real racing conditions, the SP-1 is built to withstand the toughest use, combining style, lightness, and performance.

AVAILABLE MATERIALS

- Natural Titanium
- Black Ceramic-Coated Titanium

SP-1 TITANIUM EVO STREE LEGAL

The evolution of simplicity.

Born from the success of the SP-1, the new **SP-1 EVO** turns minimalism into an art form, reinterpreting its spirit to transform it into pure aesthetic elegance.

A silencer **Made by HP CORSE**, designed and developed in the heart of Italy's Motor Valley, where design and performance blend in perfect harmony.

Oval-shaped and dedicated to modern Touring and Off-Road motorcycles, it is made entirely of titanium, available in natural or black ceramic-coated finish. **EURO 5 approved**, it draws inspiration from the essential forms of the past while looking to the future with a bold, contemporary style. The stamped, conical end cap features structural ribs that emphasize its strength and character.

The round outlet, free of welds along the bend, ensures optimal gas flow and a clean, harmonious aesthetic.

Reinforced titanium mounting brackets, hand TIG-welded, guarantee absolute strength even under the most extreme racing conditions.

The laser-engraved HP CORSE logo on the titanium sleeve is the signature of Italian quality and passion.

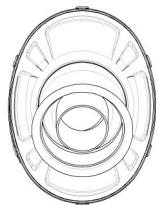

SP-1 EVO is an exhaust without limits, designed for those who live the motorcycle as an extension of themselves, always ready to go beyond their boundaries.

AVAILABLE MATERIALS

- Natural Titanium
- Black Ceramic-Coated Titanium

SP-2 TITANIUM STREE LEGAL

Where design becomes art.

The new **SP-2 TITANIUM** represents the latest evolution in the HP CORSE range.

Born from the success of the SP-1, it carries forward its minimalist spirit, transforming it into **mechanical art** through distinctive side ribs that echo the end cap design and embody the true essence of off-road riding.

Developed in the heart of Italy's Motor Valley, the **SP-2 TITANIUM** features a compact oval shape (90x120 mm), ideal for modern lightweight Off-Road and ADV motorcycles.

It is crafted from the finest material, **titanium**, and available in natural or black ceramic-coated finishes.

EURO 5 and EURO 5+ approved, it draws inspiration from the essential designs of the past, reinterpreted with futuristic and dynamic lines.

The end caps and silencer body merge into a single, harmonious, and fluid shape, while the round outlet (forged from a single piece and free of welds) ensures strength, efficiency, and authentic off-road style.

The titanium sleeve is available in **three lengths (300 mm, 350 mm, and 400 mm)** to perfectly suit every configuration.

Dual laser-engraved HP CORSE logos complete a technological and breathtaking look.

SP-2 TITANIUM: where engineering, art, and the passion for adventure meet.

AVAILABLE MATERIALS

- Natural Titanium
- Black Ceramic-Coated Titanium

SP-1 TITANIUM CARBON STREE LEGAL

The spirit of off-road. The elegance of carbon.

An oval titanium body embraces conical stamped end caps, culminating in a carbon fiber tip with a bold, distinctive profile, sharp yet fluid in its lines.

The front heat shield, also made of carbon fiber, varies depending on the motorcycle model to ensure perfect aesthetic and functional integration.

SP-1 CARBON reinterprets the great classics of the past through the clean lines of its silencer body, enhanced and refined by the carbon fiber components. The linear design of the central body expresses a truly authentic Off-Road spirit, rigorously tested at the HP CORSE R&D Center, both on the dyno and across the toughest terrains.

On the titanium sleeve, the “**HP CORSE Titanium**” laser-engraved logo stands out as a hallmark of Italian craftsmanship and quality.

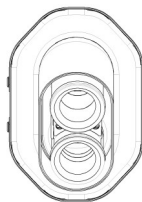

SP-1 CARBON: strength, lightness, and design for those who live adventure without compromise.

AVAILABLE MATERIALS

- Natural Titanium
- Black Ceramic-Coated Titanium

4-TRACK R STREE LEGAL

Pure lines. Spirit of adventure.

Pure, essential lines define an exhaust born for those who love to travel far and embrace the thrill of wide-open spaces.

The **4-TRACK R** is dedicated to **Maxi Enduro**, **Sport Touring / Adventure**, and **Crossover** motorcycles of the latest generation, machines built to push beyond boundaries and ride past the horizon.

Designed at the **HP CORSE R&D Center in Bologna**, the 4-TRACK R is strong, durable, and reliable, engineered to face the toughest conditions and the longest journeys across roads, mountain passes, and deserts around the world.

Tested for over a year on both the dyno and demanding real-world routes, it delivers superior performance and increased torque at low and mid-range rpm compared to stock exhaust systems.

Lightweight and compact, it features **octagonal end caps** and a **hydroformed outlet**, an advanced manufacturing process that allows the creation of seamless, perfectly finished components.

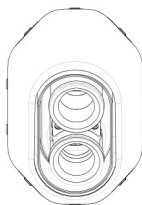

The titanium silencer body is adorned with the **laser-engraved HP CORSE logo**, a hallmark of absolute quality.

AVAILABLE MATERIALS

- Natural Titanium
- Black Ceramic-Coated Titanium

SPS CARBON STREE LEGAL

The evolution of the 4-TRACK R.

Directly derived from the 4-TRACK R, the new **SPS CARBON** retains all of its technical and structural features while standing out with a more refined and sporty design.

The **octagonal silencer body** ends with a **carbon fiber end cap** that embraces the **hydroformed outlet**, combining strength, lightness, and precision craftsmanship.

Its clean, sharp lines give the exhaust an aggressive, dynamic look, perfectly integrated with the latest-generation **Adventure** and **Sport-Touring** motorcycles.

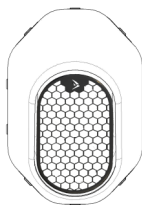

The **laser-engraved HP CORSE logo** and the **homologation number** engraved on the inner wheel side certify the product's quality and authenticity. **SPS CARBON** is available in an **EU-approved version**, designed to deliver high performance, absolute reliability, and a distinctive, unmistakable sound.

AVAILABLE MATERIALS

- Natural Titanium
- Black Ceramic-Coated Titanium

SPS CARBON RALLY STREE LEGAL

Authentic rally spirit.

The new **SPS CARBON RALLY** is born from the experience of the SPS CARBON, inheriting all its technical and structural features while expressing an even bolder and more adventurous personality.

Compared to the original version, the SPS CARBON RALLY retains the same **carbon fiber end cap** that surrounds the **hydroformed outlet**, now enhanced with a **metal mesh insert**, a technical and stylistic detail that emphasizes the exhaust's rally character and its true **Off-Road soul**.

Designed for the latest-generation **Adventure** and **Sport-Touring** motorcycles, the SPS CARBON RALLY is available in an **EU-homologated version**, ensuring reliability, durability, and top-level performance even in the toughest conditions.

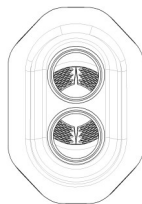

The **laser-engraved HP CORSE logo** and the **homologation number** etched on the inner wheel side certify the quality and artisanal craftsmanship that define every HP CORSE product.

AVAILABLE MATERIALS

- Natural Titanium
- Black Ceramic-Coated Titanium

SP-3 CARBON STREE LEGAL

Sharp design. Racing soul.

The shape of the end cap, inspired by speed and the dynamic lines of modern design, makes the **SP-3 CARBON** the ideal silencer for the latest generation of motorcycles, machines defined by sharp, aggressive styling.

Derived from the **SPS CARBON**, the new **SP-3 CARBON** features an end cap that geometrically extends the metallic body of the silencer, creating a sleek, sporty, and harmonious layout.

The **dual outlets** follow the straight flow of the lines, ensuring optimal exhaust gas performance and high efficiency.

The **laser-engraved HP CORSE logo** and **homologation markings** guarantee precision, durability, and authenticity.

The **hand TIG-welded mounting brackets**, directly fixed onto the silencer body, highlight the craftsmanship and attention to detail that have always defined HP CORSE.

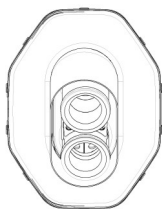

Each **SP-3 CARBON** comes with a **carbon fiber cover** designed specifically for the motorcycle model it is intended for, ensuring perfect aesthetic integration.

AVAILABLE MATERIALS

- Natural Titanium
- Black Ceramic-Coated Titanium

4-TRACK RR STREE LEGAL

Pure power. Rally spirit.

The new **4-TRACK RR** is born for those who love to push beyond limits and explore new horizons. Perfectly suited for the Austrian 1290, it combines **power and reliability** in a bold rally-inspired design, ideal for riders who see every journey as a challenge.

Tested both on the **dyno** and across **extreme terrains**, it delivers superior performance and enhances the delivery of the V-twin engine, providing a quicker, more responsive, and powerful throttle feel at every rpm.

With its **octagonal end caps**, **hydroformed outlet**, and **carbon fiber cover**, the 4-TRACK RR gives the bike an aggressive and distinctive look, combining **technology, lightness, and Italian style**.

EU-homologated, it is **2.73 kg lighter** than the original exhaust system.

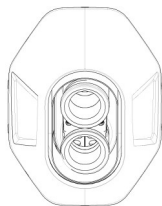

The **titanium silencer body**, laser-engraved with the HP CORSE logo, is available in two elegant and durable finishes. The kit also includes a **carbon fiber heat shield** and a **dedicated link pipe** for connection to the original catalytic header.

AVAILABLE MATERIALS

- Natural Titanium
- Black Ceramic-Coated Titanium

SPS CARBON RR STREE LEGAL

Racing DNA. Carbon elegance.

The new **SPS CARBON RR** inherits all the technical and structural features of the **4-TRACK RR**, enriched with a **carbon fiber end cap** that enhances both its elegance and Rally-Racing character.

Designed specifically for the **KTM 1290**, the **SPS CARBON RR** combines **power, lightness, and style** in a compact, assertive design, built to conquer any terrain with outstanding performance and absolute reliability.

Tested extensively on the **dyno** and across **extreme routes**, it ensures optimized exhaust flow and smoother power delivery, providing a quick and progressive throttle response.

Its **octagonal end caps**, **hydroformed outlet**, and **carbon fiber end cap** give the exhaust an aggressive, distinctive look, while the **carbon fiber heat shield** completes the ensemble with a refined finish.

EU-homologated, the **SPS CARBON RR** is **2.73 kg lighter** than the original exhaust system.

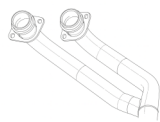

The **titanium silencer body**, laser-engraved with the **HP CORSE logo**, is available in two elegant and durable finishes.

AVAILABLE MATERIALS

- Natural Titanium
- Black Ceramic-Coated Titanium

FULL EXHAUST HEADERS RACING PARTS

Artisanal excellence.

HP CORSE headers are designed using advanced **3D CAD technology** and manufactured with state-of-the-art **CNC-bent tubing**, ensuring absolute precision, optimal flow smoothness, and maximum performance efficiency.

Each individual component is **3D laser-cut** and **hand-assembled** using **TIG welding**, then manually brushed to achieve a flawless surface finish and superior corrosion resistance.

Before delivery, every header undergoes a **rigorous in-house quality inspection**, using precision jigs that faithfully replicate the motorcycle's frame geometry to guarantee perfect fitment and total compatibility.

HP CORSE headers: the perfect synthesis of technology, performance, and Italian artisanal passion.

AVAILABLE MATERIALS

- AISI 304 Stainless Steel
- Titanium

hpcorse ➤

THE HP CORSE STEET RANGE

The HP CORSE Steet range is made for those seeking top performance, emotional design, and Italian craftsmanship.

Each exhaust is the result of advanced technology, premium materials, and rigorous testing—where form and function merge to create unique products that enhance the personality and character of every motorcycle.

HYDROFORM

Matter transformed into emotion. Created using hydroforming technology, it offers variable-volume shapes with no welds, reduced weight, and exceptional rigidity. Sleek, lightweight, and high-performing, it's designed for high-end naked and sport motorcycles.

HYDROFORM SHORT

A compact and aggressive version of the HYDROFORM, featuring an oblique-cut end cap and removable metal grille. A sporty look, excellent performance, and distinctive sound in a reduced format.

HYDRO TRE

Designed for the MV Agusta Tre Pistoni, this is a one-of-a-kind exhaust, entirely hand-welded. Three hydroformed, organ pipe-style outlets with increasing diameter ensure unmatched efficiency and mechanical allure. Available in Satin Stainless Steel or Black Ceramic finish.

GP-07

Compact, lightweight, and pure. Made of stainless steel with hand-brushed end caps and visible welds, it's the shortest exhaust in the HP Corse range. Available with a solid-machined aluminum or metal mesh outlet.

EVOXTREME

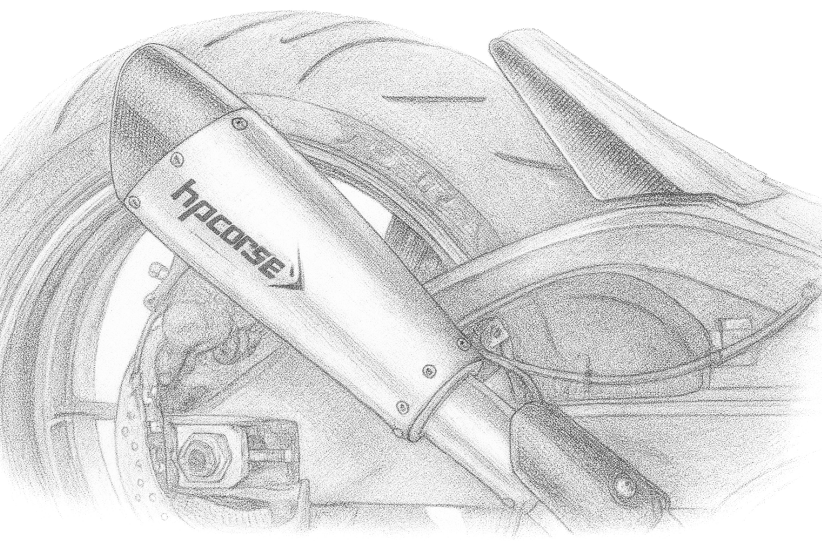

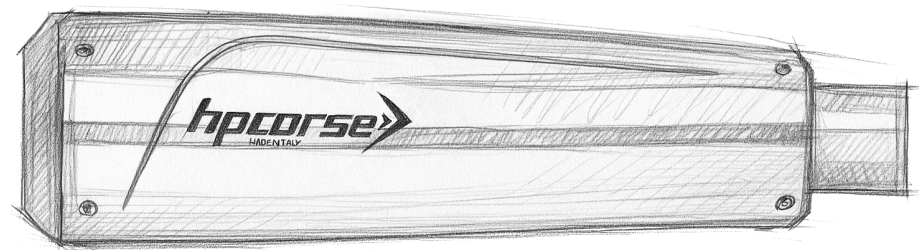

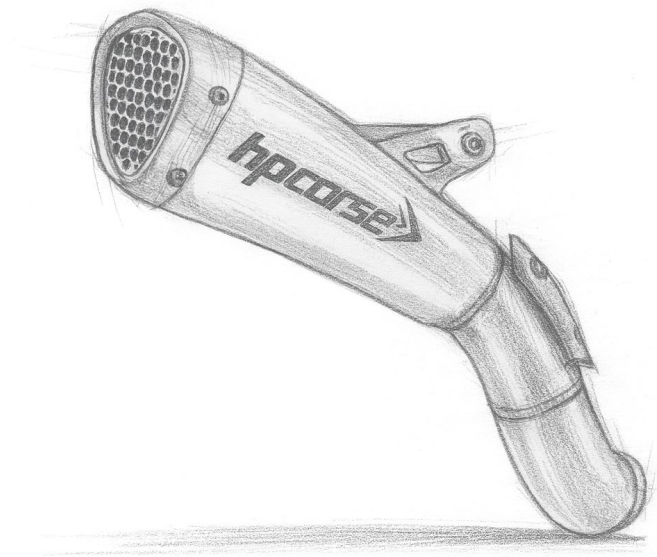

Born for racing, with a titanium or stainless steel body and carbon fiber "slash-cut" end cap. Its irregular, weld-free shape delivers a deep sound and exceptional performance tested on the track. Available in 260 mm and 310 mm versions.

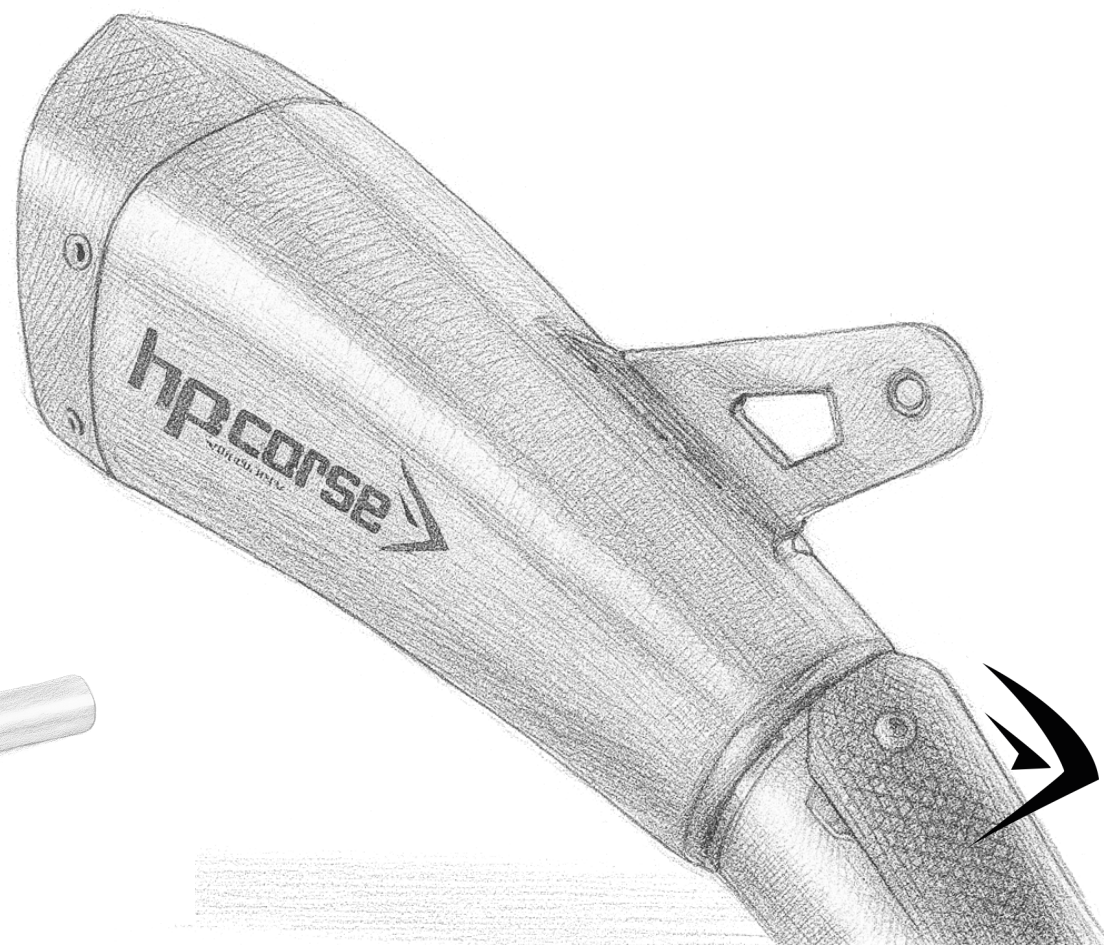

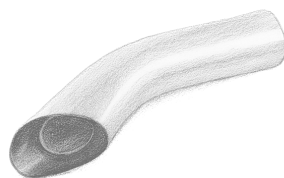

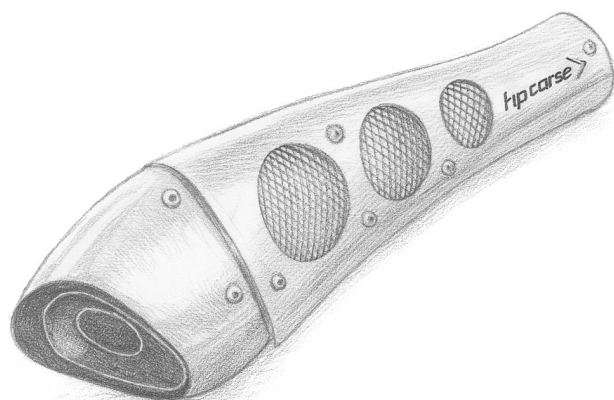

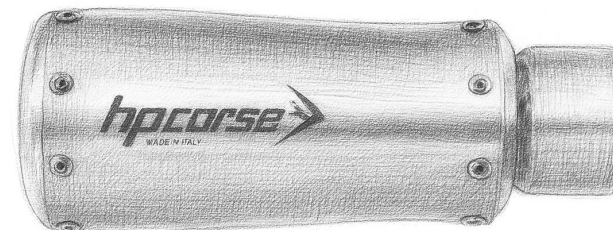

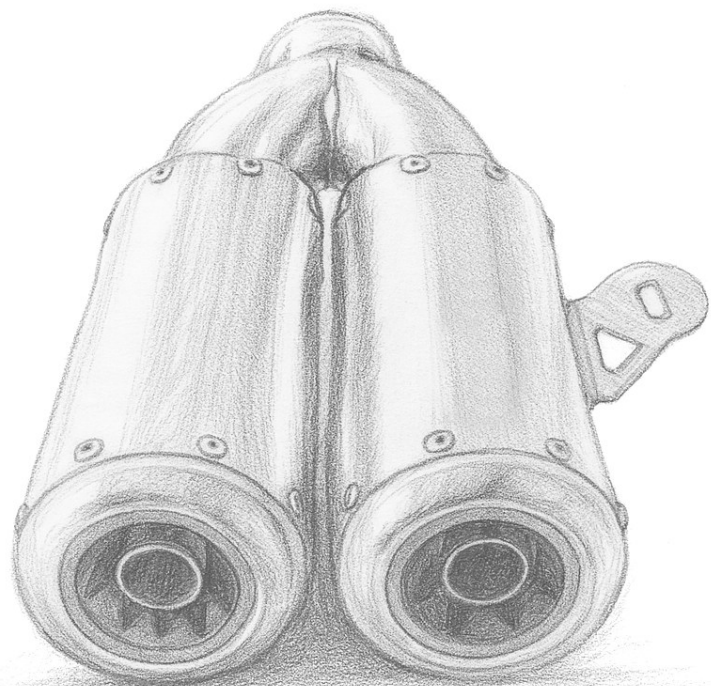

HYDROFORM RS

Dedicated to Custom and Café Racer motorcycles, combining retro style and modern technology. Conical hydroformed stainless steel body, available in brushed or black ceramic-coated finishes, round end caps with four rivets, and laser-engraved logos.

hpcorse ➤

HYDROFORM STREE LEGAL

Technology. Performance. Design.

HYDROFORM is the new exhaust line developed to deliver **maximum fluid-dynamic efficiency, structural rigidity, and weight reduction.**

The **hydroforming technology** used in its production allows metal deformation through the force of a **high-pressure fluid**, which shapes the sheet metal until it perfectly adheres to the mold's surfaces.

This process makes it possible to obtain **variable-volume forms, free from welds**, and characterized by an **optimized internal surface** that ensures the **best exhaust gas flow.**

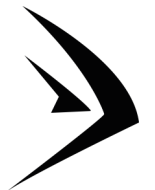

The result is an exhaust with **extremely thin walls, high mechanical rigidity, and record-breaking lightness**, guaranteeing **superior performance** in both **power** and **throttle response**. The **HYDROFORM** line is designed to equip the most powerful **naked, sport, and hypersport motorcycles** on the market, enhancing their **design** and improving overall **dynamic performance.**

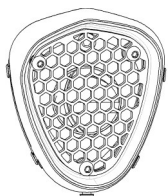

With **HYDROFORM, sound, power, and aesthetics** reach a new level of **technical perfection.**

AVAILABLE MATERIALS

- AISI 304 Stainless Steel
- Black Ceramic-Coated AISI 304 Stainless

HYDROFORM SHORT STREE LEGAL

Compact. Aggressive. Technologically advanced.

HYDROFORM SHORT is born from the experience and design of the HYDROFORM model, reinterpreted in a shorter, more essential, and sportier version.

The main body retains its **hydroformed structure**, created using **high-pressure fluid deformation technology**, which allows for **complex shapes** and **continuous surfaces without welds**, ensuring **optimal gas flow** and **superior structural rigidity**.

The **distinctive feature** of HYDROFORM SHORT is its **obliquely cut end cap**, an element that emphasizes its **aggressive line** and enhances its **aesthetic integration** with modern motorcycles. Completing the design is a **removable metal grille** that protects the gas outlet and allows riders to **customize the exhaust's look and functionality** according to their needs. **HYDROFORM SHORT** offers the same **outstanding performance** as the HYDROFORM line, with **reduced weight**, **high mechanical strength**, and a **distinctive sound**, but in a more **compact, racing-inspired configuration**.

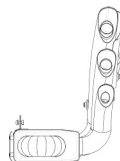

Designed for **naked, sport, and hypersport motorcycles**, HYDROFORM SHORT is the perfect synthesis of **advanced technology**, **dynamic design**, and **pure performance**.

AVAILABLE MATERIALS

- Satin-finished stainless steel
- Black ceramic-coated stainless steel

HYDRO TRE STREE LEGAL

Exclusivity, craftsmanship, and uncompromising performance.

Designed exclusively for **MV Agusta "Tre Pistoni"** models (with the exception of the F3, due to fairing clearance), **HYDRO TRE** represents a **one-of-a-kind exhaust system** in the world combining **beauty, innovation, and top-level performance**.

Each component is **handcrafted and hand-welded** by highly skilled technicians, with the care and precision that only the **finest Italian craftsmanship** can provide.

The structure consists of an **expansion chamber pre-silencer** and **three hydroformed end pipes** in a **"organ pipe" configuration**, with progressively decreasing diameters—a solution that **optimizes gas flow** and gives the system its **distinctive aesthetic signature**.

The **connecting joints** also feature **tapered sections**, improving **fluid-dynamic efficiency** and providing a **quicker engine response**.

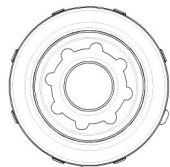

Every HYDRO TRE is completed with a **laser-engraved HP Corse logo**, a mark of **authenticity and superior craftsmanship**.

AVAILABLE MATERIALS

- Satin-finished stainless steel
- Black ceramic-coated stainless steel

GP 07 STREE LEGAL

Compact. Lightweight. Essential.

The **GP-07** is the **shortest and most compact exhaust** in the HP Corse range, developed to deliver **maximum performance in minimal space** while ensuring a **sporty design with strong visual impact**.

Made entirely of **stainless steel**, the GP-07 is built using **state-of-the-art forming technology**, which allows for **smooth lines and continuous surfaces**. The **end caps**, stamped in stainless steel, are **hand-brushed** for a high-quality finish.

The **welds**, performed by specialized technicians, are **left visible** to highlight the **craftsmanship** and **construction precision** typical of HP Corse products.

The end pipe is available in different outlet configurations:

- **Machined solid aluminum nozzle**
- **Metal mesh nozzle**

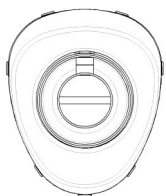

The **GP-07** guarantees **maximum lightness** and a **sporty, engaging sound**, in true **HP Corse style**.

AVAILABLE MATERIALS

- Satin-finished stainless steel
- Black stainless steel

EVOXTREME STREE LEGAL

When the extreme becomes form. When performance becomes art.

EVOXTREME was born from **passion, constant innovation,** and the **desire to push beyond every limit.**

Designed for the **world of racing,** it is an exhaust system developed to offer **teams and riders** a **winning product,** capable of combining **technology, design,** and **absolute performance.** The result of research and development by the **HP Corse R&D Center in Bologna,** EVOXTREME has been **tested on test benches and on the track,** with the contribution of professional riders, achieving **outstanding results** in terms of **power, torque, and engine response** across all rev ranges.

Its design is **revolutionary.** The **silencer body** is made of **stainless steel,** available in **satin** or **black satin finishes.** The **carbon fiber end cap** features a **tapered pentagonal “slash-cut” profile,** a perfect balance between **aesthetics and functionality.** The entire structure is characterized by an **irregular and asymmetrical geometry,** narrowing towards the weld-free connection pipe, creating a **dynamic and innovative visual effect.** The result is a **unique product,** with a **strong aesthetic impact** and **benchmark performance** within its class. EVOXTREME represents the **perfect fusion** of **stylistic research** and **technical functionality,** with a **deep, aggressive, and unmistakable sound.**

It is available in **different body lengths: 260 mm and 310 mm** (street legal), and up to **370 mm** for **racing track versions.**

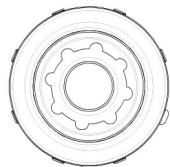

EVOXTREME: born to challenge the impossible, built to win.

AVAILABLE MATERIALS

- Natural titanium
- Satin-finished stainless steel
- Black stainless steel

HYDROFORM RS STREE LEGAL

HYDROFORM RS is an entirely new exhaust system, **previewed at EICMA**, and represents the **natural evolution of our expertise in hydroforming** — the technology that has always distinguished **HP Corse** and makes each of our products **unique in the world**.

HYDROFORM RS was created to **blend refined design, advanced technology, and authentic sound** — essential elements for those who see motorcycling as an expression of **freedom and personality**.

The **hydroformed conical sleeve** is made of **thin-gauge stainless steel** and enhanced by **two lateral ribs**, one on the outer side and one on the wheel side, highlighting both the **strength** and the **elegance** of its shape.

The **round end caps**, stamped in stainless steel, feature a **smaller inlet diameter** than the outlet to create a **conical terminal**. Each end cap is **secured with four rivets**, ensuring **maximum strength and long-lasting durability**, while the **laser-engraved HP Corse logos** confirm the **authenticity and craftsmanship** of the product.

HYDROFORM RS is **fully homologated** and perfectly combines **aesthetics, functionality, and performance**, delivering a **full, deep sound** that amplifies the **character of every engine**.

HYDROFORM RS: the perfect fusion of metallurgical art and pure motorcycling spirit.

AVAILABLE MATERIALS

- Satin-finished stainless steel
- Black ceramic-coated stainless steel
