PURITY OF DESIGN

It is the strongest and most powerful "globetrotter" of the Hamamatsu House designed for those who love challenges but who also prove to be perfect for the city and for trips outside the city. With its double-beam aluminum frame, upside-down fork and single shock absorber (both adjustable) but above all thanks to the powerful 90 ° V twin engine, the last SUZUKI V-STROM 1050 is a bike that does not fear kilometers and obstacles. To 1050 HP CORSE dedicates its exhausts to synthesize the versatile spirit of the powerful Jap. Tested on the road and on the dyno-test, the new HP CORSE exhaust systems are reliable and completely changes the rear lines giving cleanliness and attention to detail while the powerful bi-cylinder engine also gains in delivery, particularly at low and medium engine speeds. Laser engraved logo, a silencer canister available in three different materials (Titanium, Satinized Steel, Ceramic Black Steel) with octagonal shaped bottom, hydroformed oval or carbon-fiber end-cap. Euro 5 approved.
