Yamaha Tènèrè 700 has a flowing line designed for agile and fast driving. A motorcycle created for rallies and long-distance adventures that at the same time proves perfect for dirty roads and everyday roads. For this bike equipped with a 689 cc 4T engine, HP Corse has made two different exhausts: **4-TRACK R SHORT** and **SPS CARBON SHORT**.

4-TRACK R SHORT designed in the R&D center of Bologna, is equipped with a seamless hydroformed stainless steel end cap equipped with a dbk. Available in three different materials (titanium, satin steel and black ceramic steel), it redesigns the rear line of the beautiful Yamaha, enhancing its aesthetic characteristics, agility and sound. Pure and essential lines, 4-TRACK R SHORT loves the emotion of large spaces. Strong, capable of withstanding the most difficult situations, it exalts itself by covering many kilometers. Tested on the bench, on the most demanding roads and tracks, the HP Corse exhaust is light, reliable and able to guarantee superior performance compared to the original muffler. It has an octagonal bottom, the end cap (hydroformed) with double outlet barrel and a carbon heat shield positioned between the front and the fittings. Euro 4 approved.

SPS CARBON SHORT inspired in the forms by the 4-TRACK model, the new SPS CARBON SHORT has a beautiful carbon fiber end-cap with dbk that breaks the lines of the silencer body to follow the shapes of the stainless steel spout. Tested on the bench, on the toughest and dirty roads, SPS CARBON SHORT guarantees reliability and superior performance compared to the original exhaust, generating a peak of power especially at low and medium speeds, as well as extraordinary torque. Able to reinvent the back of the Tènèrè, it is available in three different materials: titanium, black ceramic coated stainless steel, satin stainless steel and is equipped with a carbon heat shield positioned on the fittings. Approved for Euro 4.
