Approvals and information

* : HP CORSE's exhaust are homologated according to "EU" - Regolamento Dalgato (UE) 134/2014 e 1824/2016 - Homologation valid for "Propulsion Unit Code": 122EN - 122EJ - 122ED/F -Num. omolog.: G 00105
The "Propulsion Unit Code" is the code issued by the manufacturer that uniquely identifies the model of the motorcycle or scooter. This code can be found on the registration certificate or certificate of conformity. Since the year of matriculation does not always coincide with the year of production of the vehicle, in case of doubts about the model of motorcycle in your possession, always check the Vehicle type on the registration card with the one shown on our website and in the catalog.
Likewise, if there is availability of approved exhausts, the approval is always referred to this code, so it is always recommended to carry out this check before ordering exhausts that do not conform to the specific model you have.

 The product is considered "spare part" for the purposes of CARB regulations only if the catalytic (s) converter is not modified or removed and if no changes are made to the ECU and to any sensors of the exhaust

All the prices are without VAT
